

# Eco.life

Eco.life is a project dedicated to the recycling of different types of waste, with the aim of reducing the amount of waste that ends up in landfills and pollutes the environment

## About the Service

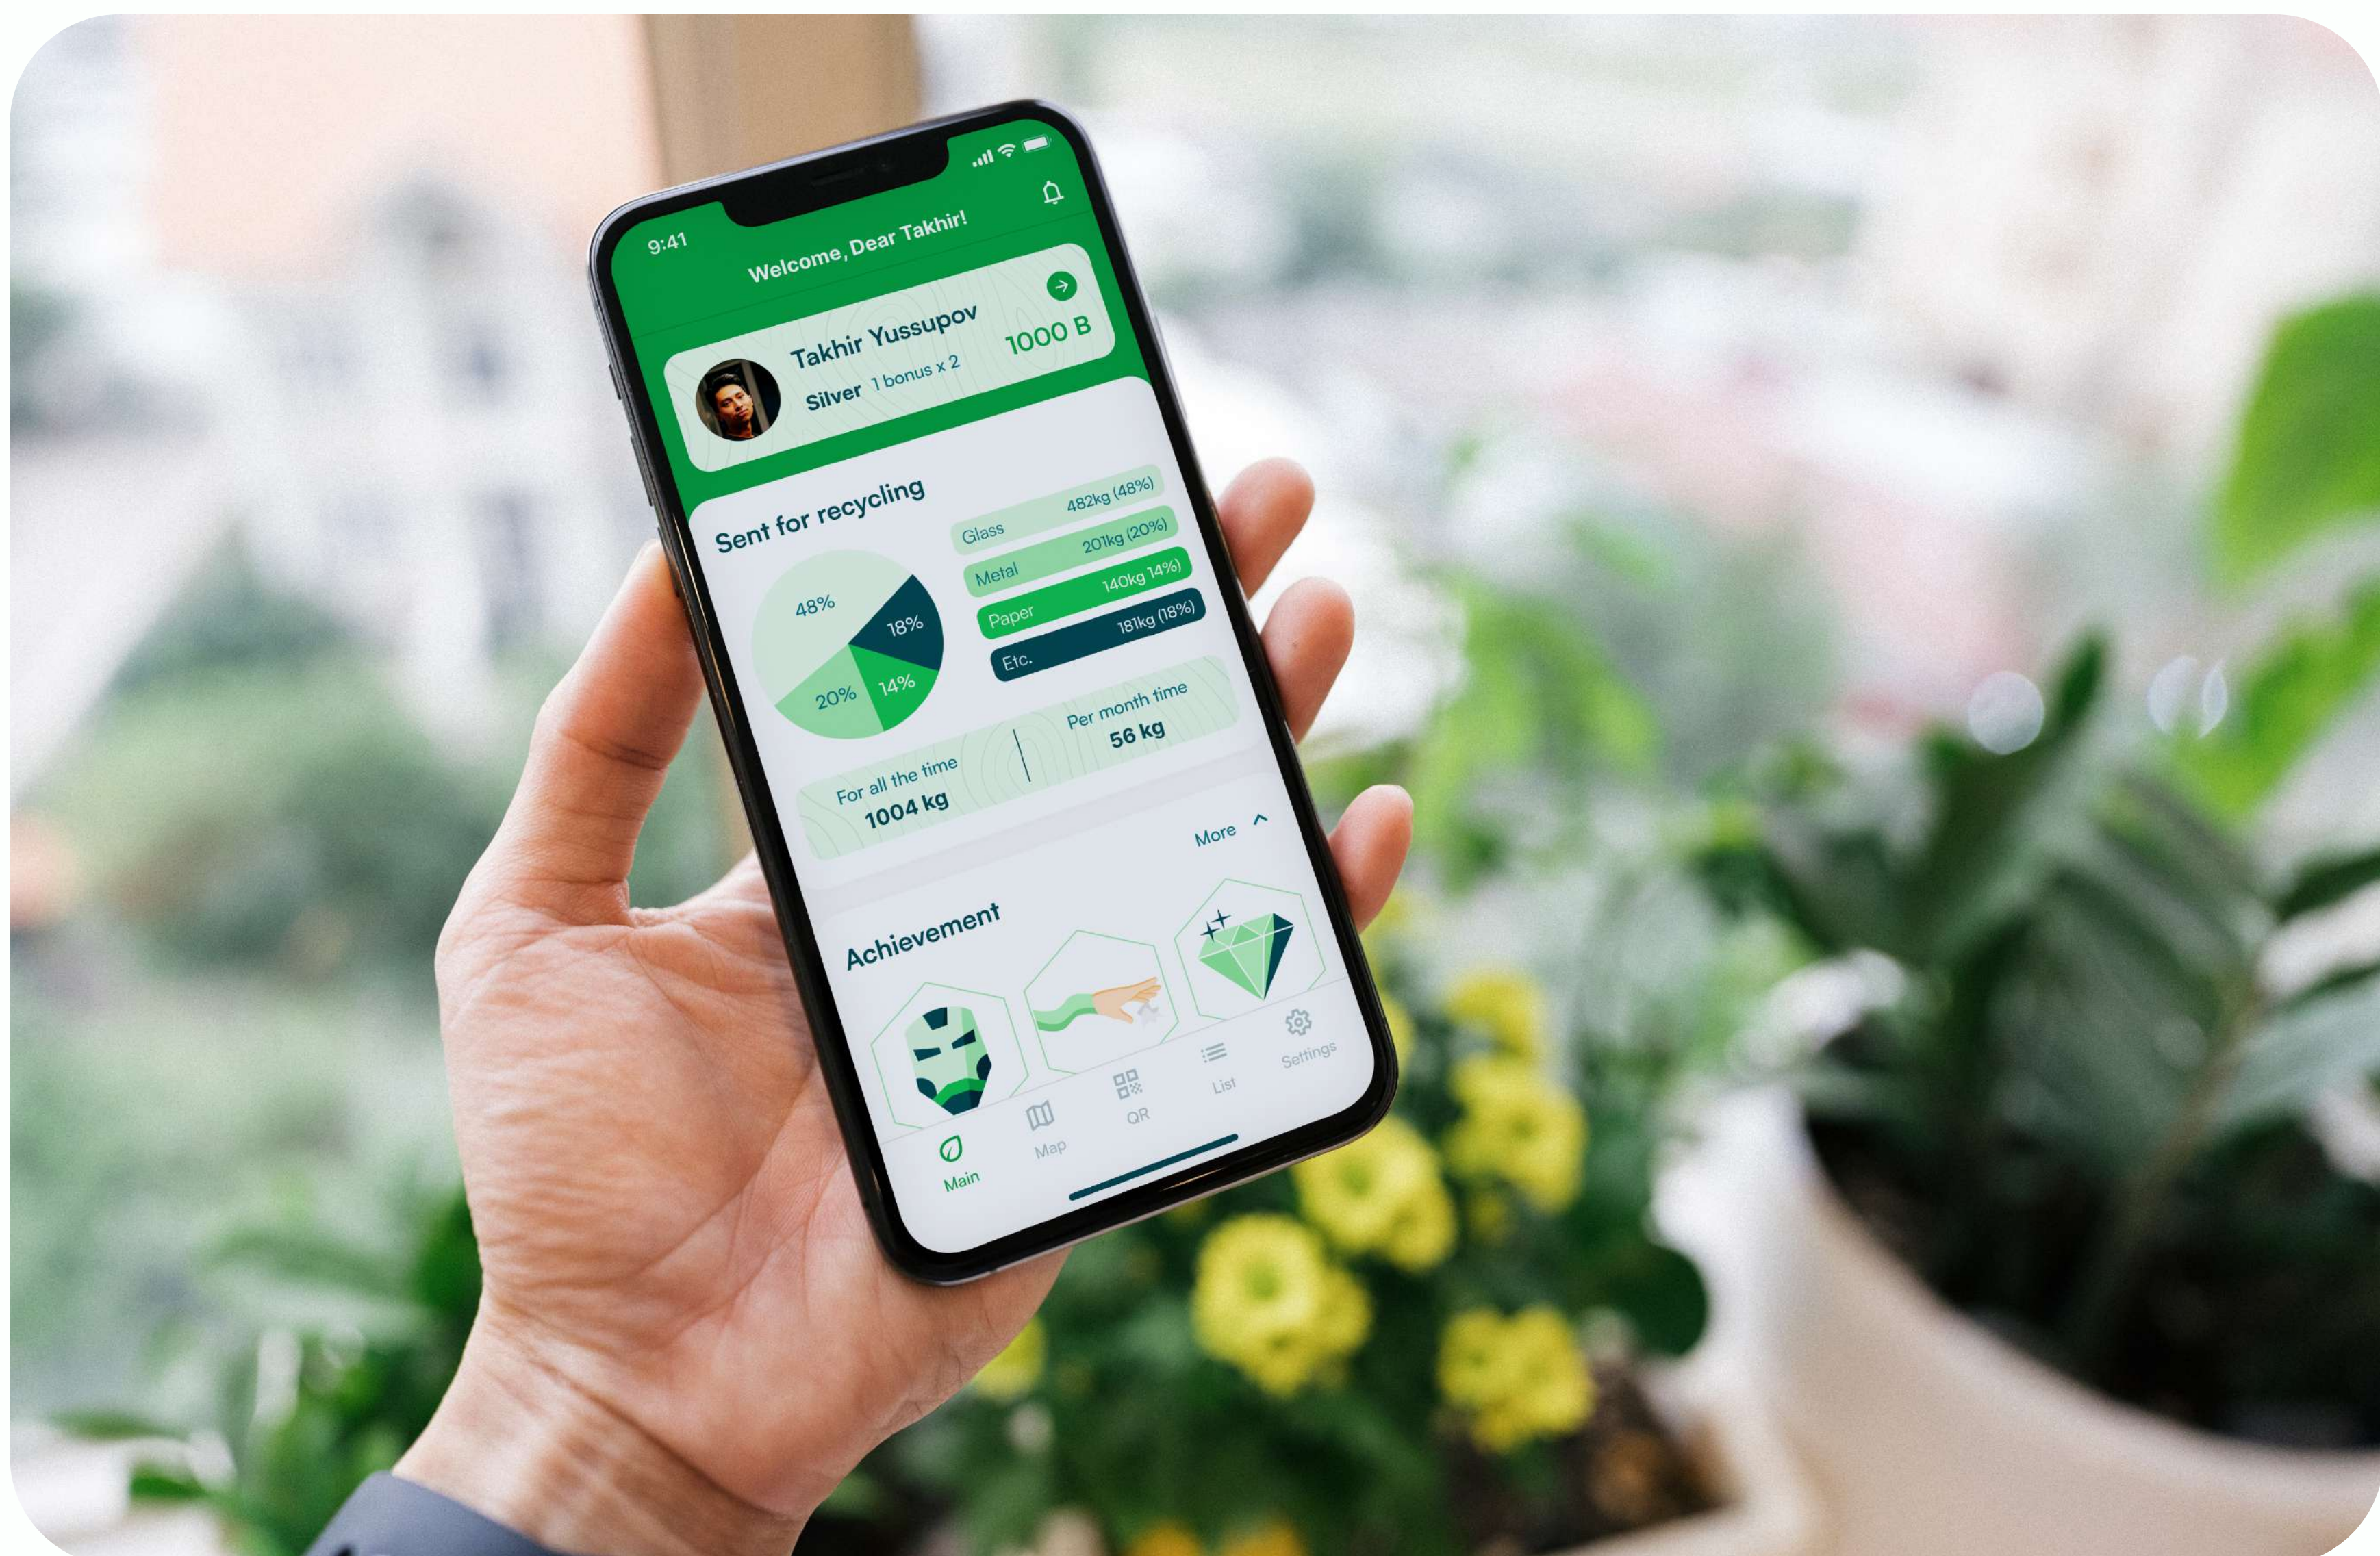

We offer a simple and convenient waste collection system for plastic bottles, glass, paper, metal, and other materials.

Residents can deposit their waste at collection points throughout the city and earn bonus points for each kilogram deposited, which can be redeemed for prizes and services.

## Goal

Eco.life is more than just a rewards program; it's a chance to help create a cleaner and healthier planet. By recycling waste, we can each make a valuable contribution to reducing pollution and improving the environment.

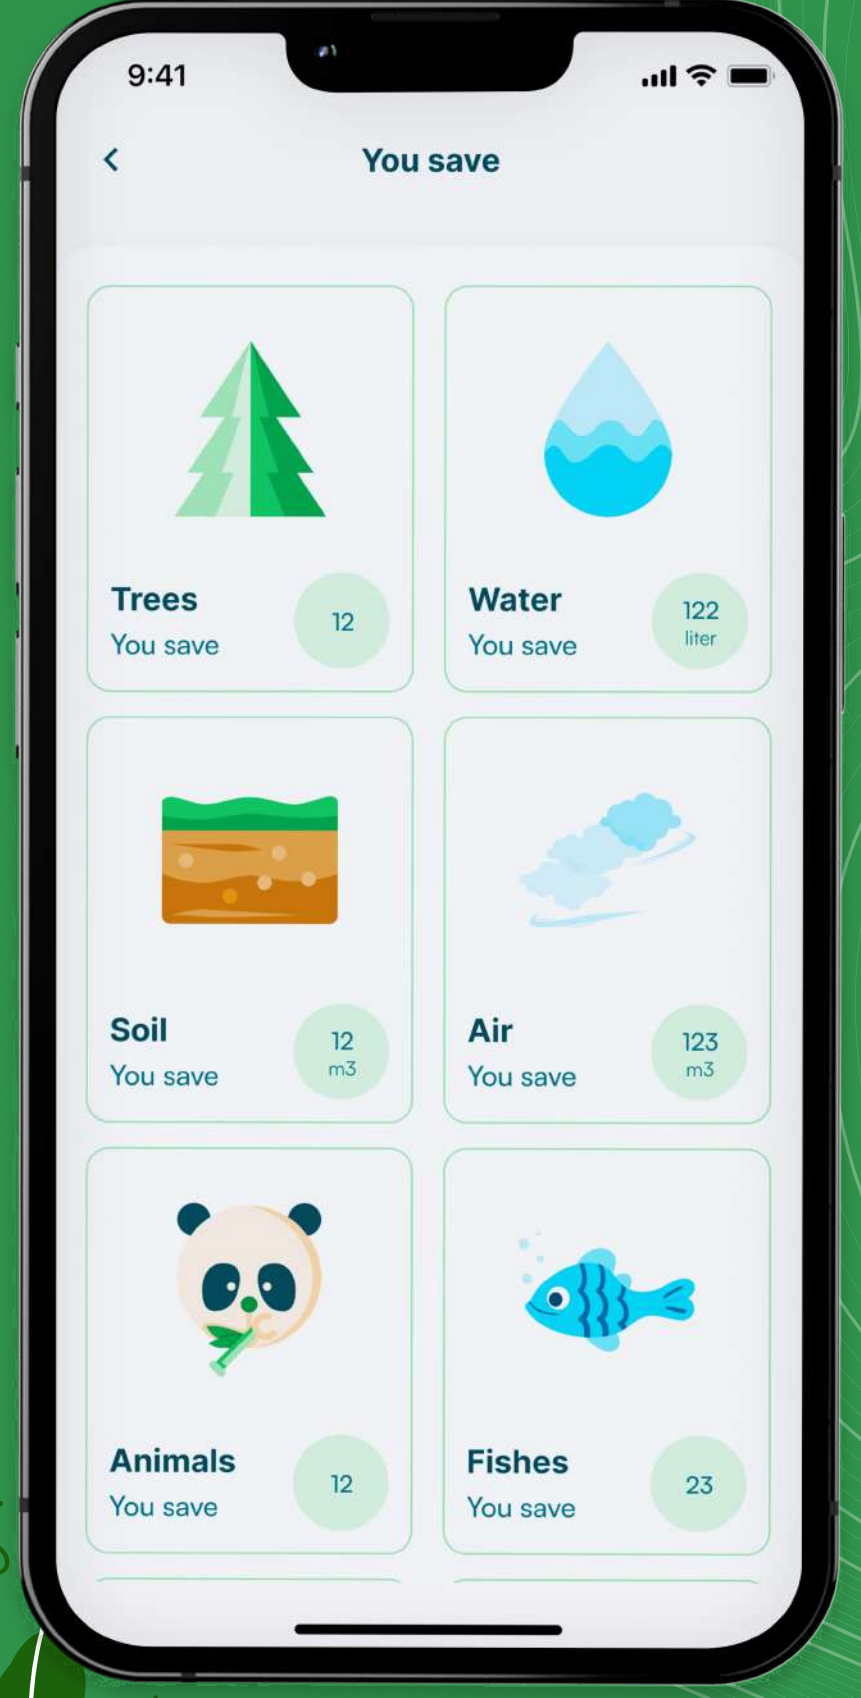

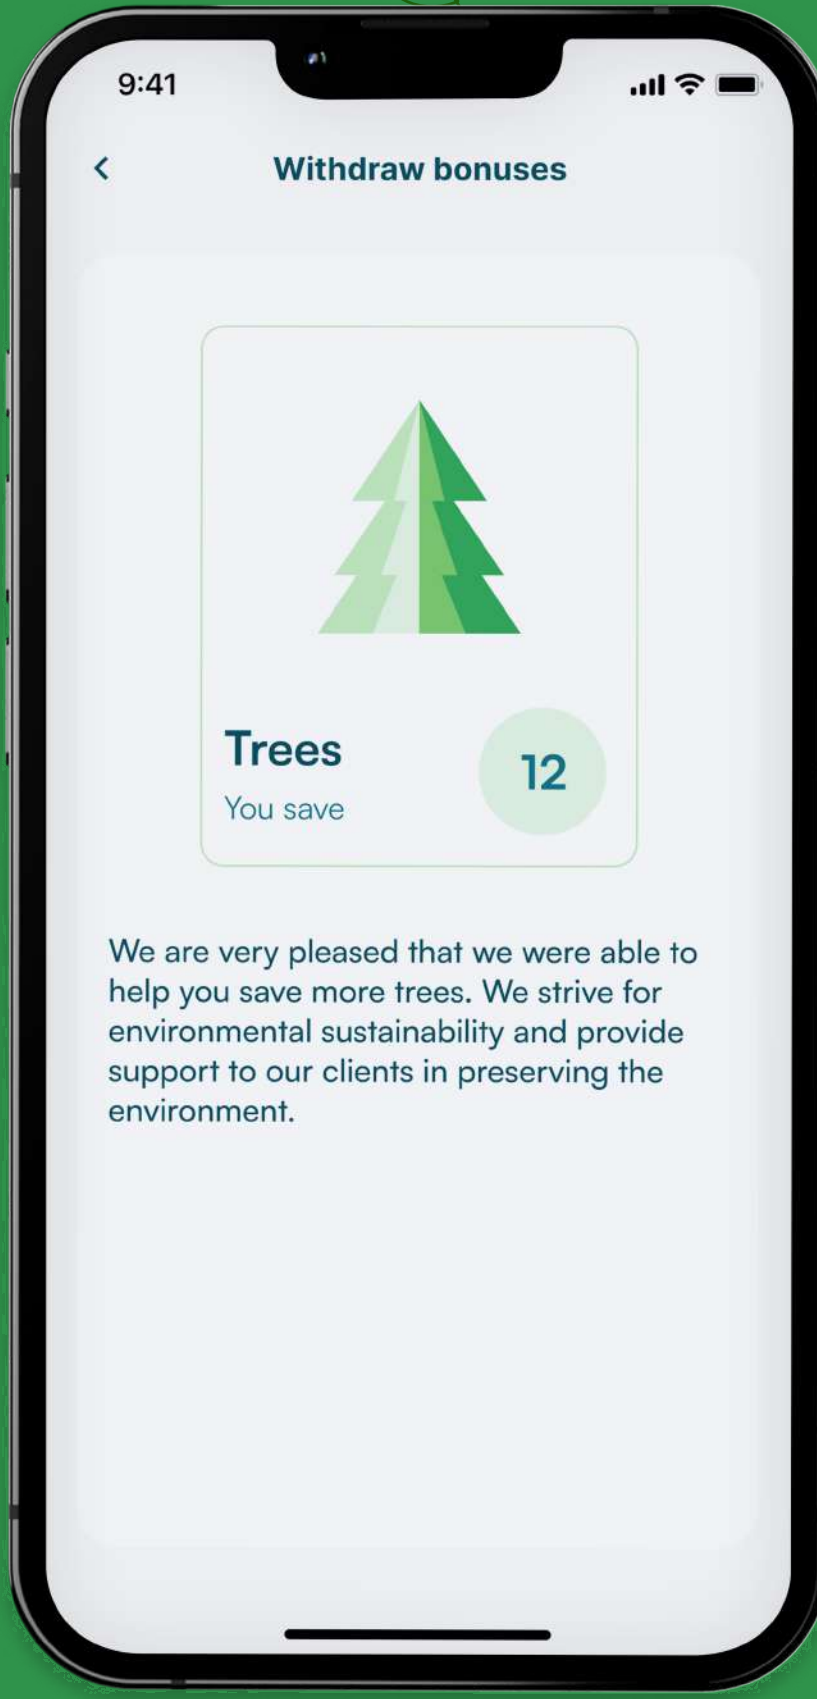

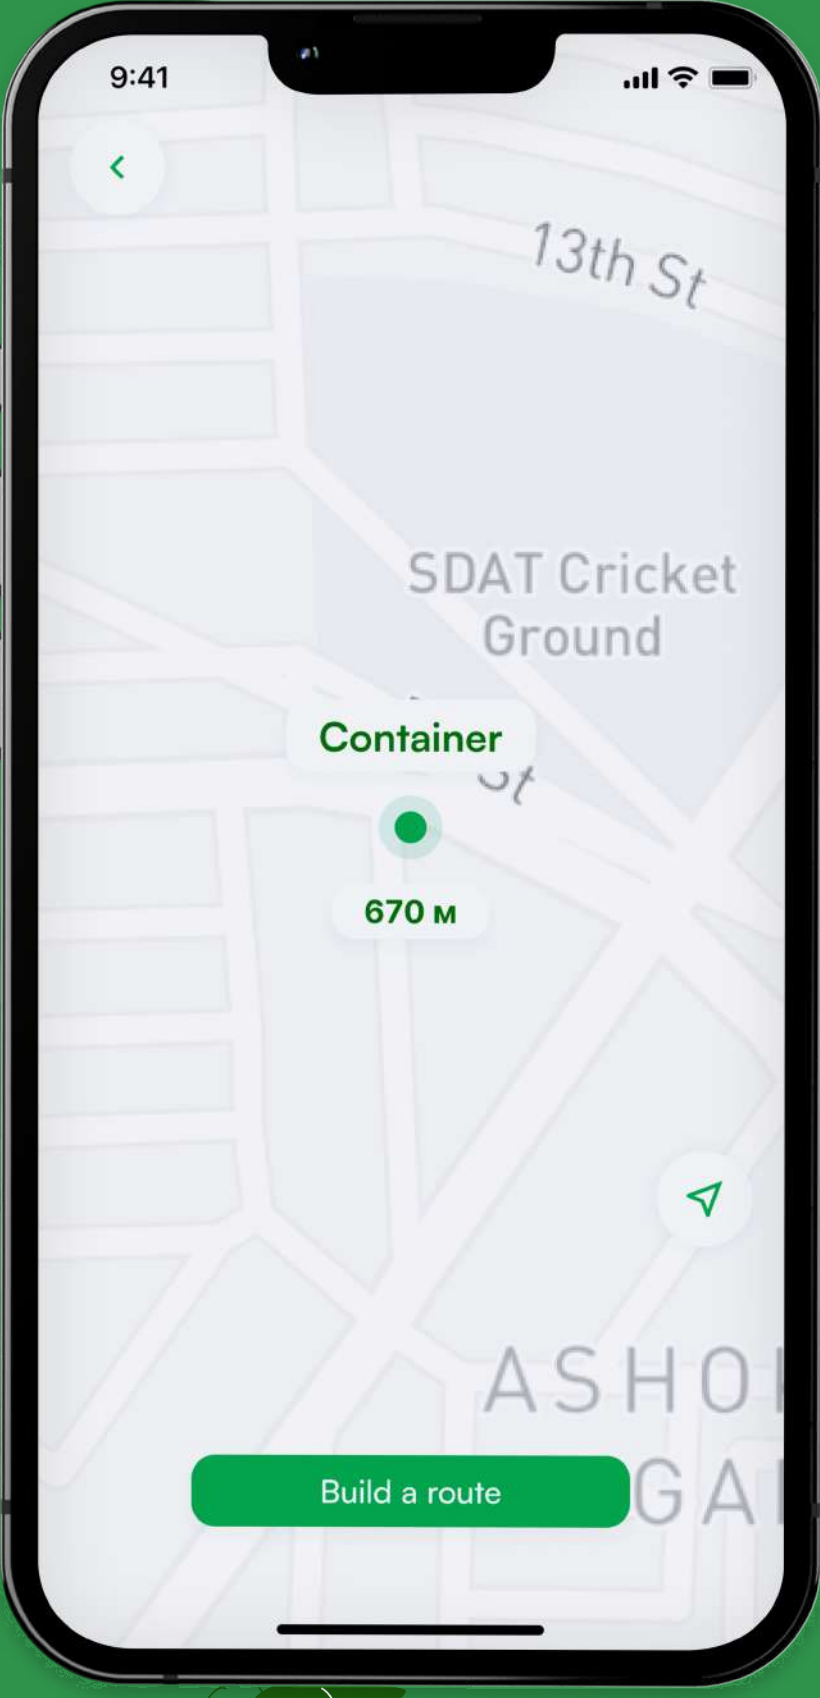

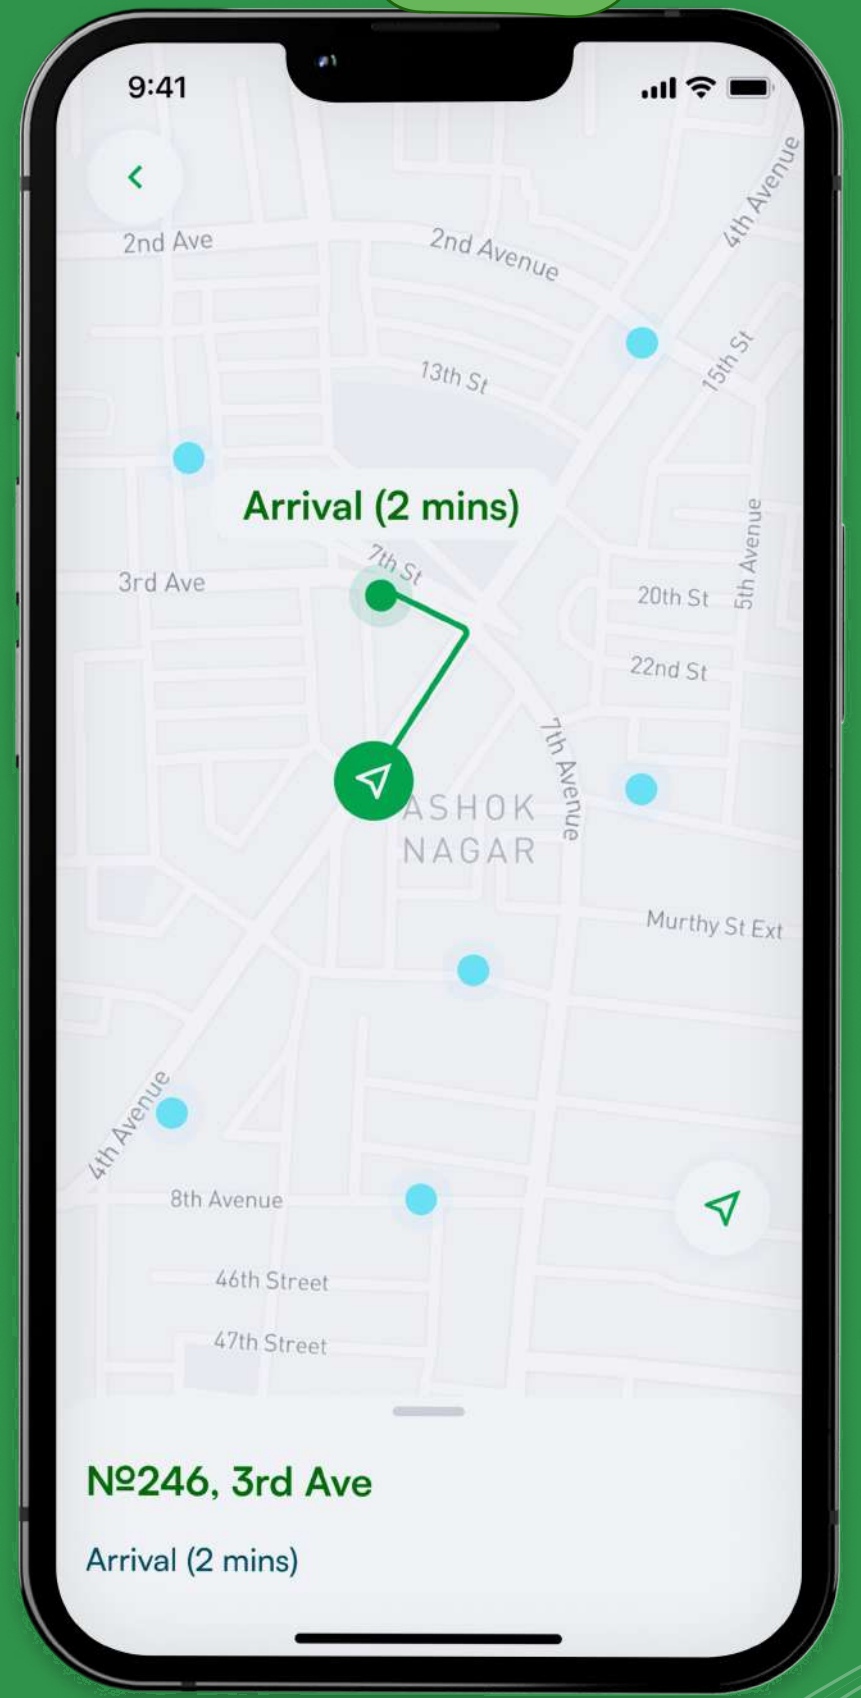

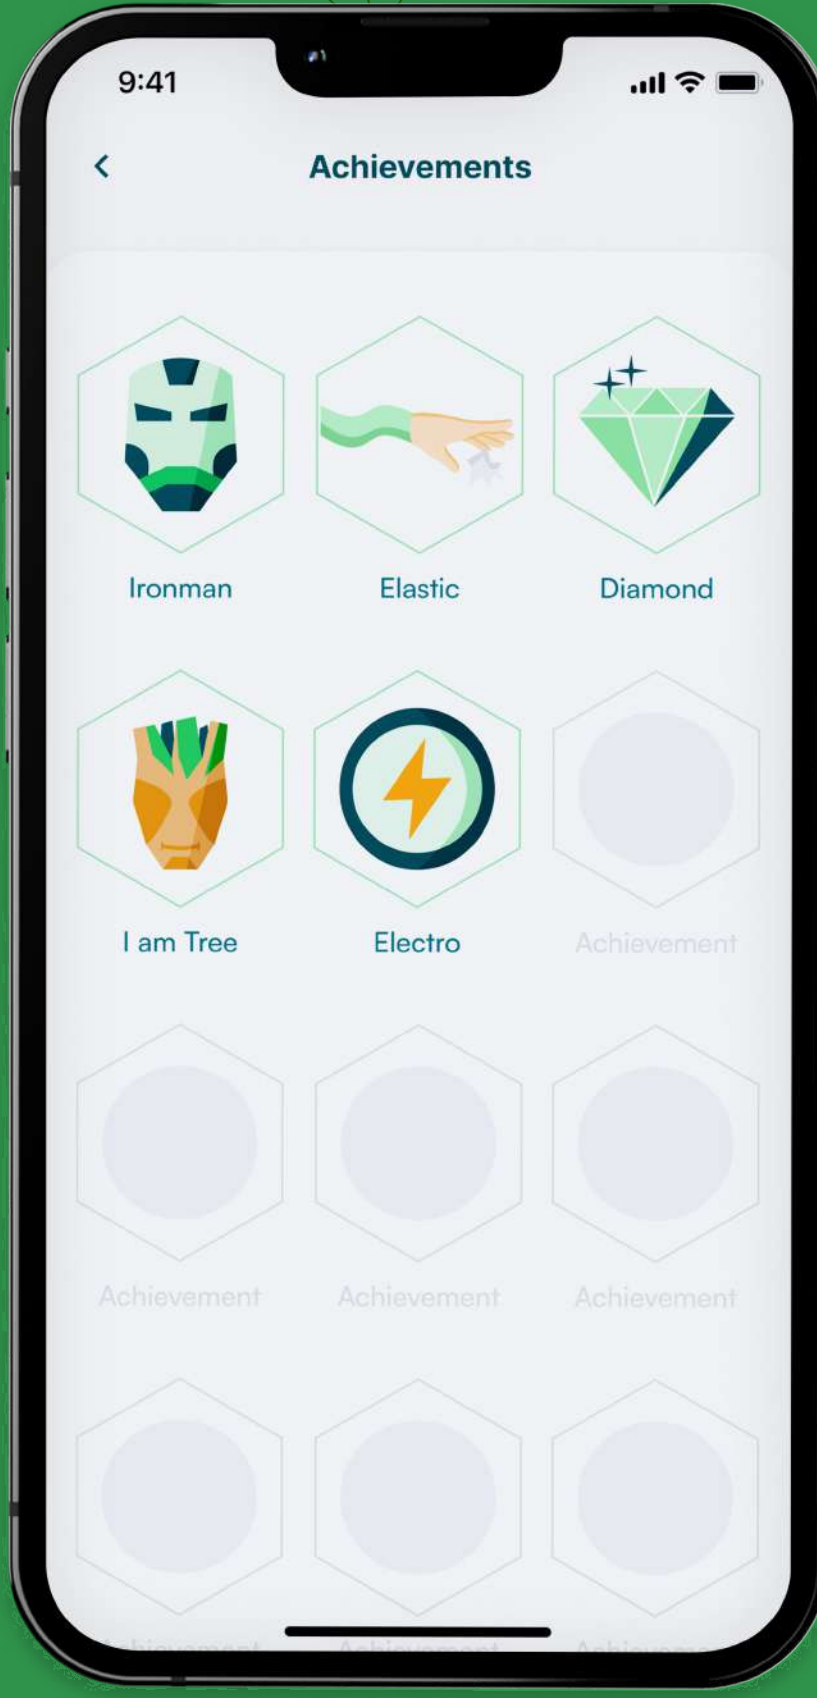

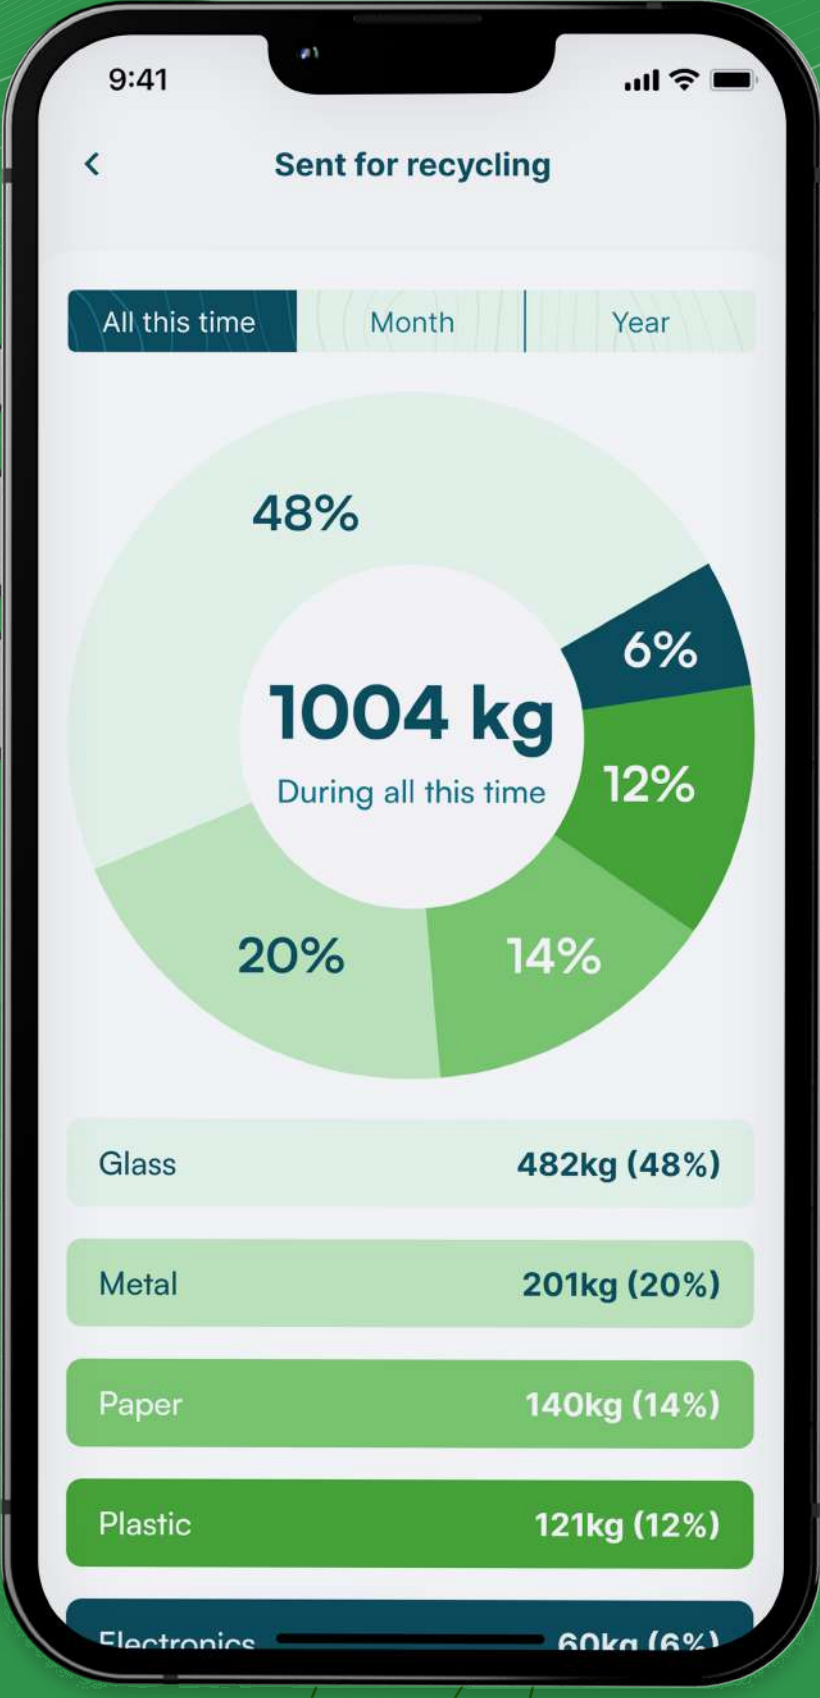

# Mobile App

We are developing a mobile application for the Eco.life service that will facilitate the process of depositing various types of waste for recycling.

With the help of the application, users will be able to quickly find the nearest waste collection points, as well as track the amount of deposited waste and bonus points that can be exchanged for prizes and services

Address: №246, 3rd Ave

Raw material: Iron, 2 Kg

## Bonuses

"Our Eco.life service provides a chance to earn bonuses by taking part in the waste recycling process. Each kilogram of waste deposited earns a specific amount of bonus points, based on the user's progress level within our system."

"Your progress level is determined by the amount of waste you send for recycling. There are five progress levels: "Regular", "Pro", "Silver", "Gold", and "Platinum". Moving to the next level is possible upon reaching a certain threshold for the amount of waste deposited."

Join Eco.life to earn bonuses for waste recycling and access more advantageous offers based on your progress level. Help create a cleaner and healthier environment in our city!
